Flora,

Here is the list of names cas numbers, and masses. Some of which I have a supplier for, but finding one supplier for as many as possible would be ideal. Please let me know what you can supply and in what amounts and purities. Also if any of these are possible to obtain pure.

Thank you,

Lucas

Hi Flora,

I see the updated quote, thank you and Andy for getting those to me. I am putting together a list of chemicals I am looking for so my supervisor can accept them all at once.

Are there any chances I could share some of those compounds with you and you could see if you have them?

Thanks,

Lucas

Hi Andy,

I am told that 500g is now too much. Would you mind quoting out 100g and/or 50g. if that is not possible I will talk to my supervisor about if that is acceptable.

Thanks,

Lucas
